## A Success Story from Bolan

During the consultative sessions, DIG members have identified the issues of health sector particularly about worse situation at civil hospital in Bolan. Citizens were not satisfied with the MS of the hospital along with that, they have identified about shortage of medicines, lack of relevant staff (medical officer, lady medical officer, stitching technician, and lab technician), non-functional labor room and unavailability of x-rays machine. DIG members have shared the mentioned issues with DHO Bolan during the consultative sessions and resultantly a positive change was observed in the services/facilities of the civil hospital in Bolan. MS of District Bolan was transferred who was sitting since last ten year due to political patronization, new staff (including lady medical officer, two male medical officers, male and female nurses and dental surgeon) was hired, medicines are provided to patients, X-ray machine has also been purchased, separate transformer for uninterrupted power supply has also been installed and new beds and equipment for emergency have been provided in the hospital. DIG members of Bolan are grateful to European Union, FNF and CPDI for providing support to the local organizations and community members through the Action.
