## A Success Story from Ziarat

Unavailability of clean drinking water have been a major issue of the citizens of Ziarat district. Under the DLG project, District Interest Group have highlighted this issues many times on different forums including consultative sessions with Local Authorities and through press conferences. During meetings with representatives of PHE department, DIG members have demanded for rehabilitation of three water filter plants in different areas of Ziarat including Main Bazar area near DC office, filtration plant at Sanjavi Road near Livestock Office and filtration plant near Jamea Masjid Ziarat.

As result if the continuous efforts by DIG members the mentioned filtration plants were rehabilitated and are now functional. Residents of these areas are getting clean drinking water from these plants. DIG members of Ziarat are grateful to European Union, FNF and CPDI for providing support to the local organizations and community members for improvement in service delivery through the Action.
